

# Manta

## Safety In Your Reach

A recovery system that launches inflatables and encircles crew overboard

## Product Description

In the event a crew member goes overboard, users can quickly deploy Manta by opening the case, removing the **pre-loaded launcher** and the **rope bag**, pulling the charging handle, aiming, and firing. The entire process takes less than **15 seconds**.

The two projectiles form a **triangular perimeter** reaching a distance of up to **100 feet**. The projectiles inflate upon contact with water, surrounding the victim with **rope** and two **flotation devices**.

## System Components

### Projectile
